- Endocrinology
- Metabolism
- Oncology

## MEDPACE

Medpace is a global, research-based drug development company led by top scientists and regulatory experts who are driven to further the advancement of pharmaceuticals in the areas of cardiology, metabolism, and oncology. With an unparalleled commitment to "best in class" science, Medpace has assembled one of the industry's most experienced and specialized medical teams to oversee every level of the company's clinical operations, providing complete and seamless drug development services.

With more than 500 employees and clinical trial experience in over 40 countries, Medpace has the global reach and capability to conduct studies and navigate regulatory requirements worldwide. Medpace provides Phase I-IV clinical trial management and data services, centralized laboratory services, a core ECG laboratory, and imaging services for clinical trials.

Through its specialized scientific and regulatory expertise and medically focused clinical operations, Medpace provides the pharmaceutical and biotechnology industries with the most efficient and cost-effective path to drug approval - from program development to product approval.

### MEDPACE CLINICAL PHARMACOLOGY UNIT:

The Medpace Clinical Pharmacology Unit (Medpace CPU) is a state-of-the-art Phase I, IIa facility focusing on confined/controlled pharmacokinetic/pharmacodynamic studies utilizing human volunteers, with first-in-man capability.

### MEDPACE REFERENCE LABORATORIES:

Medpace Reference Laboratories (MRL) is a central laboratory with locations in Leuven, Belgium, and Cincinnati, USA.

## PRODUCTS AND SERVICES

- Medical Expertise
- Regulatory Affairs
- Safety/Pharmacovigilance
- Clinical Operations
- Data Management

The expertise within Medpace Reference Laboratories includes coagulation, cardiovascular diseases, oncology, lipids, diabetes, and other metabolic diseases.

Medpace Reference Laboratories offers clients analytical support during all stages of the drug development process, with more than 65,000 square feet dedicated to laboratory operations and specimen storage. Preparation, packaging, and delivery of all supplies and materials necessary for specimen collection are also managed within the laboratory facilities.

### IMAGEPACE:

Imagepace provides a comprehensive group of services designed to seamlessly integrate imaging studies into the complex structure of a clinical trial. The Imagepace team brings clinical trial experience and discipline to the management of imaging processes to ensure that imaging study results are valid, controlled, and easily integrated into overall clinical trial study results.

Imagepace is the world leader in cIMT imaging with a network of ultrasound imaging sites and a coordinated data processing and management system. Imagepace utilizes standardized cIMT technology to conduct clinical trials with a cIMT endpoint.

### THE MEDPACE GROUP OF COMPANIES:

- Medpace-Phases IIb, III, IV clinical development
- Medpace Clinical Pharmacology Unit (Medpace CPU) -Phases I, IIa clinical development
- Medpace Reference Laboratories (MRL)-Centralized laboratory specializing in cardiovascular and metabolic studies
- Imagepace-Imaging core laboratory providing centralized image management and reading
