MEDTRIALS, INC.

ACCELERATION THROUGH COLLABORATION:

We pride ourselves on our signature collaborative approach to clinical research. MedTrials partners with pharmaceutical, medical device, and biotech companies alike to help get new, groundbreaking products approved and to market faster. When you need a trusted and experienced partner to accelerate your product to the finish line, MedTrials is the right fit for you.

PARTNER WITH MEDTRIALS, AND CREATE DIVERSITY ON YOUR TEAM:

In 2006, MedTrials, Inc. was officially certified by The Women's Business Enterprise National Council (WBENC) as a Women Owned Business. We believe that working with a certified Women Owned Business gives our clients the opportunity to support an organization dedicated to prolonged excellence and diversity in our industry.

QUALITY INDIVIDUALS ARE THE STRENGTH BEHIND OUR SUCCESS:

At MedTrials, we maintain the highest quality standards in everything we do — including our hiring practices. The entire MedTrials team comprises highly trained individuals with proven ability and industry expertise. With MedTrials being an acclaimed industry provider of clinical research training, our consultants are exposed to world-class training, and continually hone their skills by participating in continuing education programs and GCP training. The result is a well-informed and motivated team of industry

This collaborative approach, to medical product development, builds upon our shared quality standards and service philosophies in order to provide a truly seamless, global solution that leverages our regional presence and international proficiencies.

Robin Newman
Chief Scientific
Officer

"MedTrials is not a mega-CRO by choice. We are a flexible, nimble, mid-sized company with one mission in mind - to create a customized solution to meet your unique research needs. MedTrials' research professionals are smart, disciplined and creative individuals who respect the client's resources as they do their own and seek the most efficient, compliant and client-focused research solutions possible."
