QUINTILES

AT QUINTILES, IT'S ALL ABOUT RESULTS:

We helped develop or commercialize every one of the world's top 30 best-selling drugs, and nine of the top 10 best-selling biologics in 2006. Our staff – including more than 300 physicians and senior medical advisors, 650 project managers, more than 500 clinical trial leaders and nearly 3000 clinical research associates --- makes for product development teams so thoroughly experienced they can deal with potential delays before they become real problems.

THERAPEUTIC AREA EXPERTISE ACROSS THE BOARD:

Our team members at every level are trained in specific therapeutic areas. We have more than 800 CRAs with specialized cardiovascular experience, 500+ trained in oncology, more than 400 experienced in CNS studies, and many others in additional therapeutic areas.

A STRONG LOCAL PRESENCE...WORLDWIDE:

Quintiles' local presence, in more than 50 countries, has enabled us to become a leader in accelerated patient recruitment – as well as site startup and monitoring – in such nontraditional regions as Eastern Europe, South Africa, and Latin America. Our presence in so many regions ensures access to large, local populations with a wide variety of disease profiles, and to regulators and highly-qualified investigators in those areas. All our trials, whether local or multinational, follow identical SOPs worldwide and adhere to ICH GCP guidelines.

COMPELLING COMBINATION OF SCIENCE AND SERVICE:

Our project managers bring it all together with a compelling combination of therapeutic area expertise, organizational and communication skills, dedication to outstanding service, and a constant attention to detail that lowers your risk and helps everything move smoothly, all the way to registration and the global marketplace.

That's one reason that customers give Quintiles more positive satisfaction ratings than any other pharmaceutical product development company. Every day we strive to serve your needs better than the day before. And the results we deliver have made Quintiles the world's #1 pharmaceutical product development company.

MAJOR PRODUCTS/MARKETS SERVED

Quintiles' clinical teams have unmatched experience recruiting special patient populations and managing multi-site studies across a broad range of therapeutic areas.

- Anti-infectives
- CNS
- Cardiovascular
- Dermatology
- Diabetes, Endocrinology, Metabolism
