**COMPANY PROFILE:**

Spectra Clinical Research provides central laboratory services to pharmaceutical companies, academic institutions, and other medical organizations conducting Phase I – IV clinical trials. Backed by nearly a decade of clinical trial expertise and over 25 years of central laboratory services to the dialysis community, we are able to support diverse clinical trials of all sizes.

Spectra Clinical Research acts as a unique resource for organizations conducting clinical trials. As a division of Spectra Laboratories, we leverage the capacity and technology of a large organization while maintaining the flexibility and responsiveness of a small specialty laboratory. We continually review and streamline our processes to ensure timely, accurate results. Furthermore, our advanced testing platforms, specimen management, online data management application and dedicated team of service specialists help move each trial toward a successful outcome.

Spectra Clinical Research has recently been awarded contracts for 10 Phase II and III international clinical trials. With study sites throughout Europe, Asia, South America and North America, these recent contracts help to further strengthen our position in the marketplace as a global central laboratory service provider.

**MARKETS SERVED:**

Spectra Clinical Research provides central laboratory services to pharmaceutical, biotechnology, research, government, and academic organizations. We have participated in trials spanning a wide range of therapeutic areas including nephrology, gastroenterology, oncology, women’s health, and central nervous system (CNS) disorders. Our global support network ensures continuous, reliable service for clinical trials in locations worldwide including North America, Israel, South America, Europe, Australia, South Africa, and Asia.

**ACCREDITATIONS & CERTIFICATIONS:**

- College of American Pathologists (CAP)
- Clinical Laboratory Improvement Amendments (CLIA)
- New Jersey Department of Health
- Environmental Laboratory Approval Program (ELAP)

**Nicholas Brownlee, Ph.D., President**

*“We pride ourselves in working side-by-side with our customers to understand their specific needs and move their trial toward success.”*

## PRODUCTS AND SERVICES

**With extensive years of experience, Spectra’s customer care team work side-by-side with you every step of the way:**

- Project managers prepare all study-specific documents, coordinate activities with partner laboratories and attend investigator meetings
- Personnel shepherd each sample through the laboratory
- Designated customer service representatives assigned to each study ensure personalized assistance throughout the trial

**Spectra serves a full range of both routine and unique tests across a wide and growing range of therapeutic areas:**

- Support for numerous esoteric tests includes soluble transferrin receptor, aluminum, zinc, I-PTH and others
- Microbiology department offers 24/7 testing services for bacteriology
- Pediatric testing services
- ELISA and EIA tests can be set up and validated
- Cross-validated test methodologies across regions

- Global quality assurance and control measures protect analytical consistency

**Spectra offers convenient access to results through advanced Web-based reporting and data management:**

- 24/7 access to critical data
- All results accessible via one global database – speeding data processing to ensure timely completion
- Standardized report formats, reference ranges and units of measure ensure consistency across international trials
